

Al Othaim Retail Analytics Dashboard – Executive Business Report

Project Overview

This project analyzes retail sales performance for Al Othaim Markets across multiple Saudi cities between 2019 and 2025. The dashboard evaluates revenue, profitability, customer ratings, product categories, branches, and sales growth.

Executive Summary

- Total Revenue: 49.52M
- Total Net Profit: 20.71M
- Profit Margin: 41.82%
- Sales Growth: 16.45%
- Transactions: 30K+

Key Findings

1. Riyadh generated the highest revenue contribution.
2. Bakery, Beverages, Dairy, and Personal Care are the strongest categories.
3. Some branches achieve high sales but lower profit efficiency.
4. Customer ratings remain stable around 3.0/5.
5. Revenue peaked around 2022 before declining in 2024.

Business Problems Identified

- Revenue concentration in a limited number of cities.
- Decline in yearly revenue after 2022.
- Uneven branch profitability.
- Moderate customer satisfaction levels.
- Certain products contribute little profit despite sales volume.

Recommendations

1. Replicate Riyadh's successful sales strategy across lower-performing cities.
2. Focus marketing investment on high-margin categories.
3. Review pricing and procurement costs for low-profit products.
4. Launch customer experience improvement initiatives.
5. Optimize inventory planning using demand forecasting.
6. Implement branch-level performance targets and monitoring.

Expected Business Impact

- Higher profitability.
- Improved customer retention.
- Better inventory turnover.
- Increased sales growth.
- Stronger branch performance management.

Conclusion

The analysis indicates strong profitability but highlights opportunities to improve customer experience, balance regional performance, and recover revenue growth trends.
